EDIT - bug #7880

Implement centralized preference default loading strategy

10/30/2018 02:55 PM - Patrick Plitzner

Status:	Closed	**Start date:**	
Priority:	New	**Due date:**	
Assignee:	Andreas Müller	**% Done:**	100%
Category:	taxeditor	**Estimated time:**	0:00 hour
Target version:	Release 5.5		
Severity:	major	**Found in Version:**	

Description

Some preferences are loaded at Taxeditor startup before any connection to a CDM data source was made. Since some preferences now include the active CDM store in their keys, they may not be used correctly.

One case where this may be the problem:

- When starting the Taxeditor with local and DB preferences cleared, all search options are disabled.

ref #7880: improve search configuration initialization

History

#1 - 11/05/2018 11:37 AM - Katja Luther

- Status changed from New to In Progress

- Target version changed from Unassigned CDM tickets to Release 5.5

The initialization of the preferences is already moved to contextStart in LifeCycleManager, so the cdm data store is available. But the initialization of the search configuration is done, when the SearchBar is created, this is before the editor is connected to a cdm instance.
Now the search configuration is done for an editor instance not the db instance, we have to decide whether this is the wanted behaviour or the users want to define the search options for every cdm instance.

#2 - 12/20/2018 02:06 PM - Katja Luther

- Status changed from In Progress to Resolved

this should be fixed. please review.

#3 - 12/20/2018 03:30 PM - Katja Luther

- Assignee changed from Katja Luther to Patrick Plitzner

#4 - 01/11/2019 03:00 PM - Patrick Plitzner

- Status changed from Resolved to Closed

- Assignee changed from Patrick Plitzner to Katja Luther

- % Done changed from 0 to 100

The search option are now all enabled with preferences cleared.

- % Done changed from 100 to 50

In DistrEd when having status defined in DBPrefs without allow override after restart of TaxEditor (and CDM Server, relevant?) it shows the complete status list, not only those selected in DBPrefs!!

#9 - 01/17/2019 12:32 PM - Andreas Müller

- Related to bug #7856: Allow local override for distribution vocabularies added

Only if allow override is selected the correct status list is shown.

#11 - 01/17/2019 12:49 PM - Andreas Müller

upps, I just see that this ticket is maybe not about this issue, still search for the correct ticket.
