

EDIT - bug #10497

Vaadin selected epithet is gone when a record is re-opened

04/25/2024 08:40 PM - Wolf-Henning Kusber

Status:	In Progress	Start date:	
Priority:	Highest	Due date:	
Assignee:	Wolf-Henning Kusber	% Done:	0%
Category:	cdm-vaadin	Estimated time:	0:00 hour
Target version:	Release 5.43	Found in Version:	
Severity:	critical		

Description

Show case: Vaadin Test (Problem in Release)

Micrasterias truncata f. montanica Levanets & Janse van Vuuren (in preparation)

If the record is reopened, the species epithet "truncata" is gone, saving is not possible and selection of the species epithet is not possible, too. However, cancel closes the record.

The problem is: I open this record to select a already available infraspecific name.

I can select the name, here

Micrasterias truncata f. elevata Prescottt

But I cannot save this name relation, because (see above), when I cancel the record, the name relation is not saved.

The screenshot shows the 'Name editor' interface with the 'Edit taxon name' tab selected. The form includes fields for Rank (Form), Genus (Micrasterias), Specific epithet (highlighted with a blue circle), and Infraspecific epithet (elevata). The Nomenclatural reference is set to PrescottBuch. 1977. The Reference detail shows '200, pl. Cl [101], fig. 3'. The interface also has checkboxes for 'With basionym', 'With replaced synonym', 'Validation', and 'Orthographical correction'.

History

#1 - 05/17/2024 10:21 AM - Andreas Müller

- Target version changed from Unassigned CDM tickets to Release 5.43

#2 - 05/17/2024 11:35 AM - Andreas Müller

- Status changed from New to In Progress

- Assignee changed from Andreas Müller to Wolf-Henning Kusber

I can't reproduce this. Can you give a bit more input on what exactly you did?

From where did you "open this record to select a already available infraspecific name"?

And how is *Micrasterias truncata* f. *montanica* Levanets & Janse van Vuuren related to *Micrasterias truncata* f. *elevata* Prescottt?

I can't see that there should be a "name relation" so what do you mean with "name relation" in "But I cannot save this name relation, because (see above), when I cancel the record, the name relation is not saved."?
