## 1 Glossary

**CDM Database:** CDM databases are hosted by a CDM Server

**CDM Server:** A server application capable of hosting multiple CDM Databases. The content of the databases

**EDIT Platform:** The EDIT Platform is a software suite supporting the entire taxonomic workflow. Moreover, the Platform is a powerful information broker for a broad range of taxonomic data providing solid, open and well documented interfaces including a Java programmer's library and a CDM Rest Service Layer.

**window/subwindow:** This can be a view or an editor in the TaxEditor application, of which both are also referred to as "Workbench page" in the developer jargon. Subwindows can be minimized, maximized or detached as floating subwindow.

alternative terms:

- subwindow
- Tab, Editor (xmlmind)
- Editor Pane, View (oxygenxml)

**Pane:** An area in the TaxEditor to which subwindows (views and editors) can be attached. The main working area of the TaxEditor is split into multiple panes.

**Perspective:** Pre-sets of subwindows (views and editors) arrangements for specific tasks. Perspectives can help users to focus on a task.

**Dialog: ...**
