Seems to work but still needs intensive testing and maybe some cleanup.

The following dependencies were used in prior version but are currently not on the classpath:

```

For the following dependencies it is unclear if they are needed. They are marked as "Only added for correct package export" (except for commons-math which was below poi which is not needed anymore (as it looks like)):

```
lib/commons-collections-3.2.2.jar, \  
lib/commons-imaging-1.0-alpha3.jar, \  
lib/commons-logging-1.2.jar, \  
lib/hibernate-commons-annotations-5.1.2.Final.jar, \  
lib/hibernate-search-engine-5.11.10.Final.jar, \  
lib/hibernate-search-orm-5.11.10.Final.jar, \  
lib/spring-context-support-4.3.30.RELEASE.jar, \  
lib/spring-jdbc-4.3.30.RELEASE.jar, \  
lib/spring-orm-4.3.30.RELEASE.jar, \  
lib/spring-security-config-4.2.20.RELEASE.jar, \  
lib/json-lib-2.4-jdk15.jar, \  
lib/commons-math3-3.6.1.jar
```

#11 - 08/02/2022 03:43 PM - Andreas Müller

Testing needs to be done in the "with java" version.

removed them all except for commons-imaging (required in store), spring-jdbc (required for test run), commons-math (required in editor). Still needs further testing.

Cleanup should be done (in v5.33-SNAPSHOT). Can you do some further testing (e.g. imports like ABCD/biocese provider) but also others. I already tested images and maps. They are shown. I also tested the datasource view. It works.

When ready with testing we may close the ticket.

Online search and import works as expected, but importing from a file does not work anymore. I don't know whether this is related to this ticket, but in v5.32 it still works:

Using a file from test resources of cdmLib-io, the following exception appears (running the tests works)
