

## EDIT - feature request #10050

### Add missing functionality for MCL CDM dataportal

04/28/2022 02:04 PM - Andreas Müller

<b>Status:</b>	In Progress	<b>Start date:</b>	
<b>Priority:</b>	New	<b>Due date:</b>	
<b>Assignee:</b>	Andreas Müller	<b>% Done:</b>	10%
<b>Category:</b>	cdm-dataportal	<b>Estimated time:</b>	0:00 hour
<b>Target version:</b>	Unassigned CDM tickets		
<b>Severity:</b>	normal		
<b>Description</b>			
Once the MCL migrated to CDM all functionality of the MCL dataportal should be implemented also in CDM dataportals.			
Missing functionality is:			
Simple Search:			
<ul style="list-style-type: none"><li>• Ordering by MCL-Number</li></ul>			
Advanced Search:			
<ul style="list-style-type: none"><li>• family filter</li><li>• genus filter</li><li>• author filter</li><li>• advanced occurrence filter</li><li>• (search for MCL Number)</li></ul>			
However, from the MCL.mclLog table we can retrieve information which filters were really substantially used. So some of them may not need to be implemented.			
Additional issues:			
<ul style="list-style-type: none"><li>• How to implement family filtered search for alternative names ("Compositae"/"Asteraceae")?</li><li>• Handling of des. inval.</li><li>• Ref List with all MCL IDs (including 239a, Vol. 2)</li><li>• How to handle current RefDetail.Notes like [in sched.], [n.v.], [serius], ["matthewsii"]</li></ul>			
Taxon pages:			
<ul style="list-style-type: none"><li>• show MCL number (imported as Taxon.identifier) (<a href="#">#8840</a>)</li></ul>			
Maps:			
<ul style="list-style-type: none"><li>• <del>maybe similar to E+M, if not possible don't show maps</del> =&gt; mapping works, still need to adapt map section</li></ul>			
===			
<del>Also a new dataportal needs to be created and the texts from the other portal sites need to be moved to the new portal =&gt; #10184</del>			
<b>Related issues:</b>
