

EDIT - bug #10053

Problems with saving of secundum references

Target version:	Release 5.35	Found in Version:	
Severity:	critical		
Description			
mail Maryam Malekmohammady:			
This problem happened several times while working on different taxon names. I am reporting it in one case. I modified the sec. references of the synonyms of <i>Armeria transmontana</i> subsp. <i>aristatula</i> (Bernis) Franco. I saved each change one by one. I did not close the tab. I worked on other taxon names and changed the sec. reference or search a name in taxon editor. I did not receive any errors. but, when I came back to the <i>Armeria transmontana</i> subsp. <i>aristatula</i> (Bernis) Franco the sec. reference was modified again to the old version. I am worried the modifications are not saving.. In some cases I understand and change them again but if I close the tab and do not return to the taxon name immediately, I will not find it.

AM to Maryam:

... Katja and I can't reproduce. Could you please check next time you work with the TaxEditor if it still appears? It may have been solved with the recent changes.

If it still appears, does it appear always or only from time to time?

We will close the ticket if not reported again until 4/23.
