Description

Stored under links to e.g.
https://portal.cybertaxonomy.org/salvador/cdm_dataportal/occurrence/cdm_dataportal/name/7b7c2239-3836-4772-9bb4-0f9a9b17fd41/null/null/

instead of linking to
https://portal.cybertaxonomy.org/salvador/cdm_dataportal/name/7b7c2239-3836-4772-9bb4-0f9a9b17fd41/null/null/

So the duplicated occurrence/cdm_dataportal/ needs to be removed.

An example for **identification** mislinking can be found here:

This problem occurs because there is an element data-cdm-render-path containing the actual render path and this is used for the creation of the link (renderpath + link to name) in this case the render path should be empty. Need to go more in details of the code to fix this problem

#11 - 05/31/2022 11:57 AM - Katja Luther

The path to the name needs to be processed by url(), then the correct link is used.
