Description			
<p>Before start upgrade to hibernate 5.6.x if not yet done. There is still a problem with the TaxonGraphHibernateListener(Test) or TaxonGraph(Test), see related issues #7861, #7648 (and related tickets).</p> <p>Also we should try to work on all deprecated hibernate methods and remove them before upgrading to 6+.</p> <p>While working on the migration of "createCriteria()" calls, I stumbled across the JPA MetamodelGenerator (https://docs.jboss.org/hibernate/orm/5.0/topical/html/metamodelgen/MetamodelGenerator.html), we should analyze whether this is useful or more not needed complexity. Maybe there are synergies with the ModelCache.</p> <p>Also remove all "javassist" occurrence in dependencies and code as javassist is removed as dependency starting with 5.6 or 5.</p> <p>Info links:</p> <ul style="list-style-type: none">https://www.heise.de/hintergrund/Persistenz-in-Java-Neues-seit-Hibernate-ORM-6-Teil-2-9664620.html
