Description			
ERS:			
... kann ich mich nicht mehr erinnern, ob wir uns schon auf eine einheitliche Darstellung des „p.p.“ geeinigt hatten?			
In Euro+Med sieht es zurzeit so aus:			
Fritillaria lusitanica Wikstr. in Kongl. Svenska Vetensk. Acad. Handl. 1821: 352. 1821 –(p.p.) "Fritillaria nervosa" sensu Franco & Rocha Afonso 1994, err. sec. Castroviejo 2013			
Ist das die übliche und gewünschte Darstellung in einer Synonymie? In der Literatur (z.B. in der Flora Iberica) findet man für pro-parte-misapplications auch folgende Reihenfolge:			
"Fritillaria nervosa" sensu Franco & Rocha Afonso, p.p.			
Wie sind da eure Präferenzen?			
===			
RH:			
vorne ist das p. p. unschön. Ich wäre entweder für die Hintanföugung à la Fl. Iber. oder aber "Fritillaria nervosa" p. p. sensu Franco & Rocha Afonso			
===			
AM:			
... Dann würden wir das so versuchen zu implementieren, vermutlich in der Flora Iberica Variante, also mit „, p.p.“ ganz am Ende.

implemented in formatter, still need to check how this looks like on a taxon page

#5 - 07/29/2022 09:29 PM - Andreas Müller

In TaxEditor it works

#6 - 07/29/2022 10:39 PM - Andreas Müller

In dataportal it does not work yet as symbol is always rendered to "left" and "block", not "inline". I try new tagtype inlineSymbol now.

- Status changed from In Progress to Resolved
- Assignee changed from Andreas Müller to Katja Luther

Now it works in the dataportal, too:

Acanthus mollis L. sec. Cyprus

- "*Proparte mollis*" auct., p.p.

Katja, can you please review.
