History

#1 - 07/22/2022 03:34 PM - Andreas Müller

Original Documentation from DescriptionElementSource:

```
* The use of "originalNameString" within a DescriptionElementSource has to be discussed.
* In general this string is to be used for different representations of the sourced object. In this classes
* context it could also stand for the string representation of the taxon name used in the source. This
* may make sense if the taxon name is not available in the CDM and the user for some reason does not want
* to create a new ful {@link eu.etaxonomy.cdm.model.name.TaxonName taxon name}.
```

#2 - 07/22/2022 07:39 PM - Andreas Müller

- Status changed from New to Resolved

- % Done changed from 0 to 70

Resolved in cdmlib and probably also in dataportal and vaadin, but still needs adaptation in taxEditor

#3 - 07/23/2022 12:37 AM - Andreas Müller

- Status changed from Resolved to Closed

- % Done changed from 70 to 100

I guess this worked
