

EDIT - bug #10195

Character data should be ordered by character tree

12/05/2022 02:35 PM - Katja Luther

Status:	New	Start date:	
Priority:	New	Due date:	
Assignee:	Katja Luther	% Done:	0%
Category:	cdm-dataportal	Estimated time:	0:00 hour
Target version:	Release 5.46	Found in Version:	
Severity:	normal		
Description			
<p>The display of the character data in specimen details page and taxon page missing the information about the character tree used. In https://dev.e-taxonomy.eu/redmine/issues/9584?issue_count=2&issue_position=1&next_issue_id=8182#note-14 the display of aggregated descriptions in a taxon page is shown and in https://dev.e-taxonomy.eu/redmine/issues/9584?issue_count=2&issue_position=1&next_issue_id=8182#note-10 the characters of a specimen.</p> <p>The implementation for the taxon page already take the character tree into account, but still some information (the whole path) are missing.</p>

#4 - 12/06/2022 02:19 PM - Andreas Müller

- Tags changed from add to additivity

#5 - 12/06/2022 02:23 PM - Andreas Müller

- Related to feature request #8657: Order description element in portal according to CharacterTree added

#6 - 12/06/2022 02:26 PM - Andreas Müller

- Related to feature request #8798: description page: Show character hierarchy added

#7 - 12/06/2022 02:33 PM - Andreas Müller

- Target version changed from Unassigned CDM tickets to Release 5.46

Can you please check how far this is kind of a duplicate for [#8657](#) or any other of the related tickets or how far they overlap. As [#8657](#) is closed already but very similar we should check what is already implemented.

This page uses the description element, for the specimen page we only have the dto. So we have to check which additional fields/information we need in the dto and then we can use/adapt the already implemented code.

Maybe we should discuss whether the whole path of the character should be shown otherwise sometimes it is not possible to distinguish between the characters:

In this example "shape" means "basal leaves"->"lamina"->"shape"

Character	States/Values
growth form	herb [28], subshrub [1], caespitose [1]
duration	annual [22], perennial [5]
size	6-61 cm [46;̄=29]
stem quantity	1-3 [25;̄=1]
<u>shape</u>	petioliform [6], elliptic lanceolate [6], elliptic [5], oblanceolate [2], linear lanceolate [2], lanceolate [1]
branch quantity	0-16 [49;̄=6.3]
lamina shape	oblong elliptic [1], elliptical [1]
