

EDIT - task #10326

EuroMed mosses remaining issues

05/27/2023 09:18 PM - Andreas Müller

Status:	In Progress	Start date:	
Priority:	New	Due date:	
Assignee:	Andreas Müller	% Done:	20%
Category:	data	Estimated time:	0:00 hour
Target version:	Release 5.44		
Severity:	normal		
Description			
copied from #10229			
<ul style="list-style-type: none">• Dataportal:<ul style="list-style-type: none">◦ Condensed Distribution String handling EUR area◦ maps (or comment) for the separate mosses areas, shapefile needed for Russian areas (urgent) and Gr+Ae(Gr) (not urgent) => #10349◦ Condensed Distribution String for IUCN data #10327◦ Advanced search does not look nice anymore #10366• Data:<ul style="list-style-type: none">◦ synonyms (still unclear were to take from)◦ Mediterranean data (still unclear were to take from)◦ Nomencl. authors for higher taxa◦ Ireland: Discuss with authors if mapping to Hb(E) is correct◦ move endemism data to E+M Areal once possible◦ decision by ERS, if IUCN status NA should map to a distribution status native or introduced, currently it is mapped to native but probably introduced is correct (mail sent)◦ Check with ERS if Status Notes and/or Taxon Details tables were considered (in the same Excel files), see #10229#note-11, also author comparison (Tropicos - import file)• TaxEditor<ul style="list-style-type: none">◦ see how the mosses areas can be handled best in TaxEditor (don't show them usually, but allow the possibility to edit them in case a change is needed)◦ Handling of IUCN status in TaxEditor - preference needed #10323◦ Maybe move It subareas to main vocabulary• Handle EUR as alternative root as long as mediterranean data is missing• Correct handling of Tu and its childs in hierarchy and cond. distr. (see also #9502)• Discuss: should EUR be shown in condensed distribution for status "not endemic" for mosses?<ul style="list-style-type: none">◦ Pro: being not endemic in EUR does not mean being not endemic in E+M. So showing EUR explicitly clarifies that endemism is about EUR not E+M here◦ The area of scope is shown in the long representation as Europe. This at least indicates that the data is about EUR, not E+M
