Editing is implemented and works. Only the recommended icon is still missing. New ticket or easy to fix?

I think we need a new icon, which we can use for the navigator and in the factual data view. Therefore I would move it to a new ticket and solve it together with [#8930](#).

Maybe we can describe [#8930](#) a bit more general and include the DescriptionBase publish icons there. Also we could add SpecimenOrObservationBase publish icon handling as all of them should use the same icon.

I moved it there for now and close this ticket.
