

EDIT - task #2250

TODO use AbstractPagerImpl.hasResultsInRange() where possible

02/18/2011 02:24 PM - Andreas Kohlbecker

Status:	New	Start date:	
Priority:	Priority12	Due date:	
Assignee:	Andreas Kohlbecker	% Done:	0%
Category:	cdmlib	Estimated time:	0:00 hour
Target version:	Release 5.34		
Severity:	normal		

Description

in all service methods returning lists or pagers the following statement is being used to check if the query would return any records.

```
if(numberOfResults > 0) { // no point checking again
```

this should be replaced by

```
if(AbstractPagerImpl.hasResultsInRange(numberOfResults, pageNumber, pageSize){ // no point checkin  
g again
```

I added according **TODO** comments to most of these cases.

The reason for this actually is a bug which did the calculation of `hasResultsInRange` incorrectly. So I decided that this should be done centrally in static method. The `AbstractPagerImpl` seems a good place for it since it is anyway planned to implement such functionality into it #691

History

#1 - 02/18/2011 04:40 PM - Andreas Müller

- Assignee changed from Andreas Müller to Andreas Kohlbecker

#2 - 11/23/2021 08:35 PM - Andreas Müller

- Description updated

- Status changed from New to Feedback

- Target version changed from cdmlib - Old Next Major Release to Release 5.34

Is this still an open issue?

#3 - 12/09/2021 10:24 AM - Andreas Kohlbecker

- Status changed from Feedback to New
