Die Fußnote 4 vor den Fußnoten 1-3 angezeigt? Nehme an, dass liegt daran, dass sie zu dem Typus gehört. Ist aber dennoch ein bisschen verwirrend. Ist das so gewollt?			
this is a bug, the footnotes should be assembled into one one of the following footnote sections:			
<pre><li class="footnotes footnotes-taxon_page_synonymy-annotations "> <li class="footnotes footnotes-99396e2e-918e-4c94-993c-81f98181a158-annotations "></pre>			
Closely related to #4964 (footnotes for taxonRelationships taxonRelationships annotations should be rendered together)

can be solved by setting the \$footnote_list_key_suggestion parameter of handle_annotations_and_sources() explicitly.

Here at the example of creating footnotes for typedesignations:

```
handle_annotations_and_sources(
    $derivedUnitFacadeInstance,
    typedesignations_annotations_and_sources_config(),
    '',
    RenderHints::getFootnoteListKey()
);
```
