

EDIT - task #2669

Move current dataset.dtd to persistence layer and fix testListInitialization test

10/31/2011 01:20 PM - Andreas Müller

Status:	Worksforme	Start date:	
Priority:	Priority13	Due date:	
Assignee:	Andreas Müller	% Done:	0%
Category:	cdmlib	Estimated time:	0:00 hour
Target version:			
Severity:	minor		

Description

Currently mainly io-layer eu.etaxonomy.cdm.io.dataset.dtd is used, but there is another dataset.dtd at persistence-layer eu.etaxonomy.cdm.persistence.dao.hibernate.

When updating the later with text from the first an error occurs in DefinedTermDaoImplTest.testListInitialization when initializing a list of ExtensionTypes.

History

#1 - 10/31/2011 01:23 PM - Andreas Müller

- Subject changed from Move current dataset.dtd to persistence layer to Move current dataset.dtd to persistence layer and fix testListInitialization test

#2 - 07/02/2021 07:33 PM - Andreas Müller

- Description updated

- Status changed from New to Worksforme

- Target version deleted (cdmlib - Old Next Major Release)

- Private changed from Yes to No

This seems to be fixed as there is only 1 dataset.dtd left and it has been moved to cdmlib-test.
