

EDIT - feature request #3030

Jenkins php jobs: setup for code analysis, mess detection etc..

07/31/2012 08:41 AM - Andreas Kohlbecker

Status:	New	Start date:	
Priority:	Priority10	Due date:	
Assignee:	Andreas Kohlbecker	% Done:	0%
Category:	devOps	Estimated time:	0:00 hour
Target version:	Reviewed Next Major Release		
Severity:	normal		
Description			
see: http://jenkins-php.org/			

History

#1 - 01/20/2021 07:40 PM - Andreas Müller

- Description updated

target version is missing! Is it still an open issue?

#2 - 01/29/2021 09:26 AM - Andreas Kohlbecker

- Tags set to jenkins

- Category changed from server-maintenance to devOps

#3 - 01/29/2021 09:30 AM - Andreas Kohlbecker

- Priority changed from New to Priority10

- Private changed from Yes to No

this has not yet been solved, so it is still open.

Target Version? Unassigned? Since it is assigned and since it has a priority it should not go into "Unassigned ...". It instead think it does not need to be assigned to any target version.

#4 - 01/29/2021 09:55 AM - Andreas Müller

- Target version set to Reviewed Next Major Release

Assigned and prioritized issues go to "Reviewed Next Major Release" according to out ticket strategy.

I know, and this is perfectly true for tickets related to products which can be released. I am quite unsure if this strategy is applicable to devOp tickets. I will not remove this ticket from the "Reviewed Next Major Release" since it is not not worth wasting time with needless discussions. This ticket will be found once we have time for it anyway.
