

EDIT - bug #3240

media/{uuid}/metadata service fails with some metadata

12/13/2012 02:01 PM - Andreas Kohlbecker

Status:	Duplicate	Start date:	
Priority:	Priority10	Due date:	
Assignee:	Andreas Kohlbecker	% Done:	0%
Category:	cdmlib-remote	Estimated time:	0:00 hour
Target version:		Found in Version:	
Severity:	normal		
Description			
<p>The according media page (http://www.palmweb.org/?q=cdm_dataportal/media/c3ab3ef1-7983-4ca3-afdf-c4476fdec835) of the image shows some of the metadata, but not all of them. There is a minor irregularity in the image itself which may cause the problem. It is found in the IPTC field 'Chrarakter Set' which seems to contain some special characters.</p> <p>Our server in fact dislikes something in the meta-data and fails with an error.</p> <p>The server must be more robust against non standard characters in the meta data.</p> <p>the server error:</p> <pre>Problem accessing /palmae/media/c3ab3ef1-7983-4ca3-afdf-c4476fdec835/metadata. Reason: 0x20 is not a legal NCName character</pre> <p>Caused by:</p> <pre>nu.xom.IllegalNameException: 0x20 is not a legal NCName character at nu.xom.Verifier.throwIllegalNameException(Unknown Source) at nu.xom.Verifier.checkNCName(Unknown Source) at nu.xom.Element._setLocalName(Unknown Source) at nu.xom.Element.<init>(Unknown Source) at nu.xom.Element.<init>(Unknown Source) at net.sf.json.xml.XMLSerializer.newElement(XMLSerializer.java:869) at net.sf.json.xml.XMLSerializer.processJSONObject(XMLSerializer.java:989) at net.sf.json.xml.XMLSerializer.write(XMLSerializer.java:605) at net.sf.json.xml.XMLSerializer.write(XMLSerializer.java:570) at eu.etaxonomy.cdm.remote.view.JsonView.render(JsonView.java:150) at eu.etaxonomy.cdm.remote.view.JsonView.render(JsonView.java:191)</pre>
