

EDIT - bug #3535

Automatically update descriptive view if content changed

06/18/2013 04:25 PM - Andreas Müller

Status:	Closed	Start date:	
Priority:	Priority14	Due date:	
Assignee:	Katja Luther	% Done:	50%
Category:	taxeditor	Estimated time:	0:00 hour
Target version:	Release 5.3	Found in Version:	
Severity:	critical		
Description when one moves a description element from one taxon to another one and an editor is already opened for this taxon the information displayed in this editor or descriptive view is not updated automatically. E.g. I move a common name from Taxon A to Taxon B (which is already open), the information is not displayed in taxon B. I do have to close and reopen the taxon's editor first to correctly display the latest state.

History

#1 - 06/18/2013 04:25 PM - Andreas Müller

- Assignee changed from Andreas Müller to c.mathew -

#2 - 05/12/2018 07:28 PM - Andreas Müller

- Description updated

- Assignee changed from Cherian Mathew to Katja Luther

- Priority changed from New to Priority14

- Target version changed from TaxEditor Next Major Release to Release 5.1

- Private changed from Yes to No

Is this still an open issue?

If yes maybe we can easily fix it with e4 event bus functionality?

#3 - 06/28/2018 12:04 AM - Andreas Müller

- Target version changed from Release 5.1 to Release 5.2

#4 - 08/17/2018 03:50 PM - Andreas Müller

- Target version changed from Release 5.2 to Release 5.3

#5 - 08/22/2018 02:22 PM - Katja Luther

- Status changed from New to Resolved

- % Done changed from 0 to 50

Applied in changeset [taxeditor|c799a32e590620a2719f8f4edfa30604d5a23306](#).

#6 - 08/22/2018 02:22 PM - Katja Luther

- Assignee changed from Katja Luther to Andreas Müller

please review

#7 - 09/05/2018 02:32 PM - Andreas Müller

Note: ~~the selection dialog for the target taxon does show the "start" taxon too. This is not needed and should be filtered.~~

#8 - 09/05/2018 02:36 PM - Andreas Müller

- Status changed from Resolved to Feedback

- Assignee changed from Andreas Müller to Katja Luther

~~~Now, the fact is not removed from the old taxon. Only closing and reopening the taxon removes it.  
I tested this for moving a single fact (being a single fact in a description).~~~

**#9 - 09/05/2018 02:41 PM - Andreas Müller**

Moving the full description seems to work correctly.

**#10 - 09/05/2018 02:43 PM - Andreas Müller**

Note: ~~~when moving full description to another taxon the new label of the description is: "Elements moved from ...". Can we remove "Elements" bei "Facts"? Is shorter and more according to our current terminology.~~~

**#11 - 09/05/2018 02:46 PM - Andreas Müller**

Andreas Müller wrote:

I tested this for moving a single fact (being a single fact in a description).

Closing does not work if the taxon still needs to be saved. By save the fact is reattached to it without warning

**#12 - 09/05/2018 02:55 PM - Andreas Müller**

If the target taxon is dirty and unsaved and gives a warning. It says ".... all other unsaved changes will be saved". It does not say, that ONLY the target taxon name editor will be saved.

If the later is the case we should clearly state this. E.g. "Warning - the target taxon is open in another window with unsaved changes. These changes will be saved automatically. To prevent ..."

We may also think about a triple choice "Save", "Discard changes", "Cancel". Than we need to adapt the above text slightly.

**#13 - 09/05/2018 03:18 PM - Katja Luther**

this fix was only for the menu entry in taxonnavigator, but I will have a look at the problems in factual data view.

**#14 - 09/05/2018 03:31 PM - Andreas Müller**

- Severity changed from normal to critical

Upps, even more critical. Even selecting "Cancel" does not cancel the operation but still saves the target data and adds the data to be moved.

But at the same time, the other changes are not saved, not matter if one chooses "OK" or Cancel.

This is both critical.

**#15 - 09/05/2018 03:39 PM - Andreas Müller**

Katja Luther wrote:

this fix was only for the menu entry in taxonnavigator, but I will have a look at the problems in factual data view.

OK.

If calling from navigator the facts and media view of the source taxon stays grey. Even if the warning comes that it has changes that need to be saved first, which should simply finish the operation without any changes.

But even if no changes existed in source the facts stay grey and you can't see if they were all removed... and you can't add some new facts if you want.

**#16 - 09/05/2018 03:43 PM - Andreas Müller**

By the way, moving facts also moves image galleries. For the user this might be unexpected as for the user it is not clear that image galleries are handled same as DescriptionBases.

Maybe we should change this behavior or allow configuration.

**#17 - 09/06/2018 08:05 AM - Andreas Kohlbecker**

Maybe we should change this behavior or allow configuration.

+1 for "change this behavior"

**#18 - 09/06/2018 08:42 AM - Andreas Müller**

But then we should separately allow to also move media/image galleries. Otherwise it is difficult to handle images when a taxon is split, synonym swapt or any taxonomic operation takes place.

At least for the Media View we should offer a similar funtionality as for the facts view.

new ticket?

By the way, media galleries sooner or later will become an own class, not beeing DescriptionBase anymore. Then it will be handled sepatately anyway. But this still needs discussion.

OK.

If calling from navigator the facts and media view of the source taxon stays grey. Even if the warning comes that it has changes that need to be saved first, which should simply finish the operation without any changes.

But even if no changes existed in source the facts stay grey and you can't see if they were all removed... and you can't add some new facts if you want.

I can't reproduce this, the operation takes some time but if it is finished the facts view becomes white and you can see the facts.

fixed

**#23 - 09/06/2018 09:06 PM - Katja Luther**

this ticket is fixed, created a new ticket for not moving image galleries ( [#7731](#)) and for the same moving functionality in media view ([#7730](#))

**#24 - 09/06/2018 09:06 PM - Katja Luther**

- Status changed from Feedback to Resolved
- Assignee changed from Katja Luther to Andreas Müller

**#25 - 09/07/2018 09:43 AM - Andreas Müller**

- Description updated

**#26 - 09/07/2018 11:44 AM - Andreas Müller**

A minor issue: the processes often take time which is acceptable but an hourglass that the process is still ongoing is missing. So the user does not really know why he can not see a change yet.

Is it possible to add an hourglass?

**#27 - 09/07/2018 12:28 PM - Andreas Müller**

It would be nice if the tap order of the editors could be the same as before saving. Currently the order changes which is confusing for the user (as he doesn't know that the editor is closed and reopened)

**#28 - 09/07/2018 12:31 PM - Andreas Müller**

Now, changes in the source are saved properly. Changes in the target are not saved even when choosing "OK"

**#29 - 09/07/2018 12:32 PM - Andreas Müller**

- Status changed from Resolved to Feedback
- Assignee changed from Andreas Müller to Katja Luther

**#30 - 09/07/2018 12:50 PM - Andreas Müller**

Also the request for saving now appears twice if both taxa are dirty. Once before selecting the target, and then after selecting the target. I think we should change the workflow.

- first select the target
- then warn if any of source or target is dirty (adapt test of warning, either "target taxon has..." or "source taxon..." "source and target taxa have..." unsaved changes
- use the same warning text for both (actually it will be only 1 text then so it must be more or less the same), currently it are completely different texts and even the button labels are different.

Note: The text "... ebenso werden alle weiteren ungespeicherten Änderungen gespeichert" of the current second warning is misleading. As far as I understand only the 2 taxa are saved, not ALL. Maybe better use the text of the first warning (note: I changed it slightly, so update code first)

**#31 - 09/07/2018 12:53 PM - Katja Luther**

Andreas Müller wrote:

Now, changes in the source are saved properly. Changes in the target are not saved even when choosing "OK"

missed to commit, is fixed now.

**#32 - 09/07/2018 01:48 PM - Katja Luther**

- *Status changed from Feedback to Resolved*
- *Assignee changed from Katja Luther to Andreas Müller*

now only once the user is asked for saving and text is adapted.

**#33 - 09/11/2018 04:25 PM - Andreas Müller**

- *Copied to bug #7731: service method for moving descriptions should not move image galleries added*

**#34 - 09/11/2018 04:26 PM - Andreas Müller**

- *Copied to feature request #7730: Add moving functionality to media view added*

**#35 - 09/11/2018 04:28 PM - Andreas Müller**

- *Status changed from Resolved to Feedback*
- *Assignee changed from Andreas Müller to Katja Luther*

This seems all to be fixed or moved to new ticket.

Only open issue is the tab order which may change by saving ([#note-27](#)). Feel free to create a new ticket for this with lower priority.

**#36 - 09/12/2018 12:02 PM - Katja Luther**

- *Copied to bug #7754: tab order should be the same after saving of moved descriptions added*

**#37 - 09/12/2018 12:02 PM - Katja Luther**

- *Status changed from Feedback to Closed*
