Description

When new Term related entities are created within the Editor, a dummy Defined Term is created. Currently this problem affects,

- Scope section of the DetailsViewer for a Description
- ScopeRestrictedSection of the DetailsViewer for a Polytomous Key [not enabled](#)
- ModifierSection
- ModifierEditorInput used as the input object for modifier term editor

It needs to be investigated why this dummy defined term is created and potentially remove it, since terms should not be created automatically.

Scope section of the DetailsViewer for a Description

When I try to create ANY scope here I always get a red screen. So there is still something wrong

didn't test 3 and 4 (where are these to be found in the Editor) and 2 (because not available)

Still don't find ModifierSection and ModifierEditorInput. But for the first 2 (PK scope is enabled now) it works as expected. So we can close the ticket I think.
