

EDIT - bug #3737

task # 4338 (In Progress): [MASTER] Handle abbreviated title and protected cache correctly in TaxEditor

Protected caches for taxa and names behave inconsistent

09/27/2013 12:42 PM - Andreas Müller

<b>Status:</b>	Closed	<b>Start date:</b>

<b>Target version:</b>	Release 4.6	<b>Found in Version:</b>	
<b>Severity:</b>	critical		
<b>Description</b>			
Some name protected caches do not really work as expected here. We need to test the protected cache behaviour by hand.			
<ul style="list-style-type: none"><li>rank is not colored but should</li><li>if both, name.titleCache and name.nameCache are protected, switching the titleCache to unprotected results in no coloring of all nameparts like genus, specific Epi, etc. This is not correct. Correct behavior shows when no protected cache exists and only nameCache is set to protected. This means that the coloring depends on the previous state which is unwanted. Coloring should always be computed from the current state so behavior is always the same independent of a previous state (a similar behavior has been observed for references: <a href="#">#4944</a>)</li></ul>			
Also for protected taxon.titleCache we may expect that the name fields will be colored (but maybe not orange) if the taxon titleCache is protected (see ideas for coloring strategy in <a href="#">#4944</a> )			
see also <a href="#">#4338</a> , <a href="#">#3561</a> , <a href="#">#4944</a> , <a href="#">#9405</a>

- Status changed from Resolved to Closed

- Assignee changed from Andreas Müller to Katja Luther

- % Done changed from 50 to 30

The first issue is solved. The second was improved, however, it still sometimes works inconsistent meaning that the state of "irrelevance" of a field may depend on the previous state not on the generell state of the cache protection.

This is because setting "relevance" is always called in a given context and also the current code does not always reset fields from irrelevant to

relevant if it should.

As this ticket was worked on long time ago I open a new ticket [#9405](#) and close this one.
