Description			
data available only for Alga Terra (needs new import) and maybe for campanula. We may also want to use transient methods like <code>Sequence.getGenBankUri()</code> or <code>#getBoldUri()</code> . Should we move these to the <code>cdmlib-ext</code> module and make them static? see #3360

transient methods like `Sequence.getGenBankUri()` or `#getBoldUri()`. Should we move these to the `cdmlib-ext` module and make them static?

i don't quite understand this question, but i think it is ok how it is implemented at the moment:

Transient methods in the model class
