

EDIT - feature request #3756

Missing data and layout improvements for MediaSpecimen in data portal

Target version:	Unassigned CDM tickets		
Severity:	normal		
Description			
There is a Media attribute in MediaSpecimen which needs to be shown.			
#3614, #3597, #3751			
====			
For the /occurrence/{uuid}/ page the following attributes are missing (see also #10058):			
<ul style="list-style-type: none">• subject (?): not sure as this is maybe only a different label for the (protected) title(Cache)• method• identifiers (and maybe extensions and credits - not tested)			
Prepared by and preparation date are shown as "artist" and "created".			
For the tree-path some more information is missing but this is probably wanted as here not all information should be shown.			
===			
Generally I suggest that the defining media of the MediaSpecimen should be shown on top with the image on the left side and image metadata on the right (or something similar) as the defining media is by far the most important information here

Many things happened since this ticket was created. We need to check if there are still open issues.

I checked the MediaSpecimen and changed the ticket in the way that it becomes an implementation ticket.
