successor ticket to #4081 (TaxonNodeServiceImpl.makeTaxonNodeASynonymOfAnotherTaxonNode() requires TAXONNAMEBASE.[UPDATE])			
The CdmSecurityHibernateInterceptor has a map which defines properties per type that will be excluded from the permission validation. We need new Annotation @NotPartOf to populate this map in a dynamic way. This annotation will indicate that the annotated property is not a crucial part of the type and that this property should be excluded from the permission validation
