Description

specimen map should zoom to the area of the distribution or at least to the bbox which encloses the given occurrence points.

OLD Requirement:

for the latter solution #1506 (bbox in point.php should be optional) needs to be fixed first. This is no longer required since the rest_gen.php script can be used:

```
http://edit.africamuseum.be/edit_wp5/v1.4_dev/rest_gen.php?l=earth&od=1:38.326,-0.822|38.328,-0.54
2|38.062,-0.893||2:38.062,-0.893|38.012,-1.883||3:40.78,-4.009|43.461,-5.412|38.062,-0.893&os=1:c/

s joannae&ms=700&recalculate=true&legend=1
```

UPDATE Now that we are using the KML web service zooming to the bbox which encloses the given occurrence points it is fairly straight forward to implement, see #8972

For point layers from the edit map service this is working already, so the original requirement no longer accounts
