

EDIT - bug #4295

map services should respond with appropriate http status code

08/04/2014 12:17 PM - Andreas Kohlbecker

Status:	New	Start date:	
Priority:	New	Due date:	
Assignee:	Franck Theeten	% Done:	0%
Category:	geotools - map service	Estimated time:	0:00 hour
Target version:	Geo RESTServices - Next Major Release	Found in Version:	
Severity:	normal		

Description

The edit map service should respond with appropriate http status codes. For example the following request misses the as query parameter therefore the service should respond with HTP status code 400.

http://edit.africamuseum.be/edit_wp5/v1/areas.php?l=tdwg1&legend=1&mlp=3&title=b:native|a:foreign|c:rare|d:unknown&ad=tdwg4:c:MXEDU|b:MXETA|tdwg3:a:MXC.CUB|b:MXE.MXG|c:MXS.MXT&ms=500&bbox=-115.6.78.-75.19.29.8&recalculate=false

split of from #664 (Error messages for map web services implemented)
