Severity:	normal		
Description			
List of available software sites gets overwritten when updating product			

History

#1 - 10/14/2014 10:23 AM - Cherian Mathew

This problem is due to the fact that the [RepositoryManipulationPage](#) which handles the list of p2 repositories does not create a preference store which means that the list is infact not saved in the preferences.

The ideal solution would be to extend the RepositoryManipulationPage to handle the saving of the repositories and replace the existing page.

But for the moment (due to time constraints), I have added a simple saving mechanism (r21834) which is triggered on shut down of the editor.

#2 - 05/12/2018 08:48 PM - Andreas Müller

- Description updated
- Assignee changed from Cherian Mathew to Patrick Piltzner
- Target version changed from TaxEditor Next Major Release to Unassigned CDM tickets
- Private changed from Yes to No

Is this still an open issue after hardcoding update site information recently?

#3 - 08/29/2018 12:16 PM - Andreas Müller

- Status changed from New to Rejected
- Target version deleted (Unassigned CDM tickets)

Not relevant anymore as update sites are hardcoded now.

#4 - 08/29/2018 12:20 PM - Andreas Müller

- % Done changed from 0 to 100
