

EDIT - bug #4465

Handle Drag and Drop for Synonyms

Description			
Currently if you drag & drop a synonym from 1 Editor to another it works but data can not be saved as we are in a different session here.			
This needs to be solved. However, for now we should disallow dropping a synonym to another Editor. Drag & Drop should be allowed only within the same Editor.

Hallo,

ich wollte ein Synonym per Drag&Drop von einem Taxon zu einem anderen schieben und dann speichern. Habe es mehrfach probiert. Verschieben geht, aber das Speichern nicht. Habe mit der Ulteo-Version von Zuhause aus gearbeitet.

Wie krieg ich denn jetzt das Synonym an die richtige Stelle gespeichert?

This seems to work now, if you move the synonym not to an existing homotypic group. In the later case the group becomes grey - see attachment

(this is even true for the accepted taxon homotypic group)
