#### Description

Currently it is hard to tell if a cdm base has been indexed or not.

This indicator will display the percentage of cdm entities already in the lucene index per abstract base class.

We will for sure also need a webservice to return this information on request.

possible extra feature:

- show how many lucene documents are older than 1 week, 1 month, 1 year

This might become obsolete when we start using elastic search [#4182](#)
