

EDIT - bug #4957

MS SQL Server not functional as it does not allow more than 2100 parameters

06/01/2015 06:25 PM - Andreas Müller

Status:	Closed	Start date:	
Priority:	Priority13	Due date:	
Assignee:	Andreas Müller	% Done:	0%
Category:	cdmlib	Estimated time:	0:00 hour
Target version:	Release 4.12	Found in Version:	
Severity:	normal		
Description			
... for an SQL statement.			
But e.g. the term loading uses >2100 parameters (all uuids) to load all managed data.			
We need to find ways to avoid that many parameters, e.g. by splitting queries if SQL Server is database type.
