Description

the ordering of the footnotes on
http://dev.e-taxonomy.eu/dataportal/rotelisten_flora_deutschland/cdm_dataportal/taxon/6a24cc06-c5fc-4b29-aaea-ee21be1130a6/synonymy. is wrong. First comes 5 then 4, should be the other way round.

Please scroll to the very bottom of the page. There we have first "5. sensu Andere Referenzen (fuer auct. Synonyme)" and then "4. Homonym".

This is an effect of rendering the footnotes for taxonRelationships taxonRelationships annotations together:

```
<li class="footnotes footnotes-taxonRelationships "></li>
<li class="footnotes footnotes-taxonRelationships-annotations "></li>
```

They should be rendered together instead.

Closely related to #2602 (Taxon synonymy: type designation footnotes rendered together with taxon_page_synonymy footnotes)

ticket has been split of from #2679

can be solved by setting the $footnote_list_key_suggestion parameter of handle_annotations_and_sources() explicitly.

Here at the example of creating footnotes for typedesignations:

```
handle_annotations_and_sources(
        $derivedUnitFacadeInstance,
```

```
        typedesignations_annotations_and_sources_config(),
        '',
        RenderHints::getFootnoteListKey()
    );
```
