Severity:	normal		

Description

With the shutdown of codehaus.org the dependencies which were being downloaded from codehaus (<http://dist.codehaus.org/mule/dependencies/maven2/>) are now not available.

We need to find the new alternative repositories for these dependencies or move them to the EDIT Maven Repository

Open issues:

- ~~yjp is available now in central, we can upgrade to 11 probably~~
- itextpdf: check for licence issues in version 5 (probably only commercial licence), so we may want to downgrade to 4

Also version version 5.5.8 that we currently use has AGPL3 <https://mvnrepository.com/artifact/com.itextpdf/itextpdf/5.5.8>

As we had no problems with missing codehouse for years now I think we can close this ticket without further checking. I remove milestone as it does not really belong to any milestone

There are still the repository definition in cdmlib/pom.xml:

```
./pom.xml-227-     <name>JBoss Repository</name>
./pom.xml-228-     <url>http://repository.jboss.com</url>
./pom.xml-229-   </repository>
./pom.xml:230:   <!-- codehaus mule repository needed for yourkit -->
./pom.xml-231- <!--   <repository>
./pom.xml-232-     <id>CodehausMuleRepository</id>
./pom.xml:233:     <url>http://dist.codehaus.org/mule/dependencies/maven2/</url>
./pom.xml-234-   </repository>   -->
./pom.xml-235-   <!-- current spring source repositories -->
./pom.xml-236- <!--   <repository>
```

As this code is commented since 2015 I did not consider it as a real repository definition. It does not contradict "As we had no problems with missing codehouse for years now I think we can close this ticket without further checking".

However, as this special repository seems to be used only for yourkit which we use very seldom I did not want to completely remove this information that yourkit was at sometime available in CodehausMuleRepository (is this the same as the standard codehaus.org repo?).

As you are using yourkit most of us please decide if this is still needed or not or if any other change is required. Otherwise I would suggest to close the ticket again because except for yourkit maybe there definitely does not seem to be any dependency to codehaus.org anymore which is the topic of this ticket.

even if commented the CodehausMuleRepository can be removed. yjp-controller-api-redis@2015-build-15086 is available from our repo, other versions are in the central repo: <https://search.maven.org/search?q=a:yjp-controller-api-redis>
