

EDIT - bug #5159

Polytomous key list view needs right click enabling

08/21/2015 03:37 PM - Andreas Müller

Status:	New	Start date:	
Priority:	New	Due date:	
Assignee:	Katja Luther	% Done:	0%
Category:	taxeditor	Estimated time:	0:00 hour
Target version:	Unassigned CDM tickets	Found in Version:	
Severity:	normal		
Description			
Right click on the PK list does not enable the underlying PK but it should (and it does e.g. in the Taxon Navigator for Taxon Nodes).

this seems to be a problem only on windows. on cherians machine the selection also changes with a right-click. if we want the same behaviour on windows machines we have to implement a mouse listener which listen on the right-click and select the item on the position where the mouseevent occurs.

we have to decide if we want to do this or to find another hack for windows.

the taxonnavigator is based on another viewer (commonviewer).
