

EDIT - bug #5193

Changing the name of a taxon does not refresh the taxon navigator

09/06/2015 03:17 PM - Andreas Müller

Status:	Worksforme	Start date:	
Priority:	New	Due date:	
Assignee:	Katja Luther	% Done:	100%
Category:	taxeditor	Estimated time:	0:00 hour
Target version:	Release 5.0	Found in Version:	
Severity:	major		
Description What I did: <ul style="list-style-type: none">• Open an existing taxon (1 of 3 root taxa of a classification)• Change the name of the taxon via name editor (parser) from Abies abd to Abies abde• Saved taxon• Result: name was correctly shown at all places (tab of name editor, details view labels, etc.) but not in taxon navigator• Using refresh function of navigator also did not change anything.• Even closing and reopening navigator did not change anything I used the standalone version.

History

#1 - 09/06/2015 03:23 PM - Andreas Müller

I forgot to mention that the taxon was a reused taxon, so it was used by 2 taxon nodes. Maybe this is important for the described behavior.

#2 - 04/27/2018 10:41 AM - Katja Luther

- Description updated
- Status changed from New to Worksforme
- Target version changed from Unassigned CDM tickets to Release 5.0

In v4.15 this works now, after saving the navigator is up to date.

#3 - 05/17/2018 12:27 PM - Andreas Müller

- Related to feature request #2380: TaxonNavigator should work with DTO objects instead of full blown cdm instances added

#4 - 05/17/2018 12:27 PM - Andreas Müller

- % Done changed from 0 to 100
- Private changed from Yes to No
