Target version:	Release 3.12			
Severity:	normal		**Found in Version:**	

Description

Hallo,

Neuerdings werden die textlichen Verbreitungsdaten im Portal extrem redundant ausgegeben, in der Art:

„Africa: Macaronesia (Canary Is. (Canary Is.)); Northeast Tropical Africa (Eritrea (Eritrea), Ethiopia (Ethiopia)); Northern Africa (Algeria (Algeria), Egypt (Egypt), Libya (Libya), Morocco , Tunisia (Tunisia)); Southern Africa (KwaZulu-Natal (KwaZulu-Natal)); West Tropical Africa (Mali (Mali), Nigeria (Nigeria), Senegal (Senegal))",

siehe : http://cichorieae.e-taxonomy.net/portal/cdm_dataportal/taxon/09acd4fb-ab66-4d15-aea2-43f6eb1e7ee4

Sowohl bei aggregierten als auch bei direkt eingegebenen Daten.

Lässt sich das auch wieder abstellen?

Beste Grüße,

Norbert

Copied to EDIT - feature request #6452: Deduplicate equal subareas like TDWG ...		**New**

History

#1 - 09/28/2015 04:40 PM - Andreas Kohlbecker

- Status changed from New to Duplicate

- Resolution set to duplicate

- % Done set to 100

this is a duplicate of #4411

The duplication of distribution areas comes from changes that where necessary for Euro+Med. This requirement causes obviously problems for other portals but is only a temporary situation. In the comment #4411#note-13 a solution to this problem has been suggested by me but I am still waiting for this suggestion to be reviewed by Andreas Müller.

#2 - 09/28/2015 08:55 PM - Andreas Müller

Is it really true that this is a duplicate for #4411. If so the problem must exist for > 13 month. From Norbert I understand it is a new issue. Maybe a regression from #4411. So the ticket are rather complimentary and not duplicates.

I will try to review them asap but will not have time before end of TDWG.

If discussions take time maybe we should revert the changes for #4411 in the meanwhile as they are a regression for production portals, while E+M is not yet in production.

#3 - 09/29/2015 11:47 AM - Andreas Kohlbecker

I committed a hot-fix for this bug:

- ec12037 [r26028 syntax typo|* 502f871 r26027] #4411 hack to avoid regression reported in #5286

This is currently only in a branch **#4411-regression-HFX** the production portals have been switched to this branch for now.

#4 - 05/02/2016 01:28 PM - Andreas Kohlbecker

- Status changed from Duplicate to Feedback

- Resolution deleted (duplicate)

- % Done changed from 100 to 0

- Subject changed from Regression in distribution display on dataportals to seemingly duplicate distributions

reopening this ticket in favour of splitting the ticket #4411 in two

#5 - 05/02/2016 01:30 PM - Andreas Kohlbecker

- Status changed from Feedback to Resolved

- Assignee changed from Andreas Kohlbecker to Andreas Müller

- Target version changed from Release 3.12 to Release 4.1

The task of reviewing this ticket encompasses for now only the problems and ideas described in #4411#note-10 to #4411#note-13, please read all of these and also take the Sub area preference rule into account which is described in [#5050](#).

If you agree with my suggestion in #4411#note-13, please create a new ticket for the according subsequent actions.

#6 - 05/02/2016 01:33 PM - Andreas Kohlbecker

- Target version changed from Release 4.1 to Release 3.12

#7 - 03/01/2017 05:55 PM - Andreas Müller

- Related to feature request #6452: Deduplicate equal subareas like TDWG level 4 -00 areas added

#8 - 03/01/2017 05:57 PM - Andreas Müller

- Related to deleted (feature request #6452: Deduplicate equal subareas like TDWG level 4 -00 areas)

#9 - 03/01/2017 05:57 PM - Andreas Müller

- Related to feature request #6452: Deduplicate equal subareas like TDWG level 4 -00 areas added

#10 - 03/01/2017 06:05 PM - Andreas Müller

- Description updated

- Status changed from Resolved to Feedback

- Assignee changed from Andreas Müller to Andreas Kohlbecker

For the issue described in #4411#note-13 I opened a new ticket [#6452](#).

I guess this ticket here can be closed then. Correct? Maybe we can even call it a duplicate of [#6452](#).

Please do the action which you think is most appropriate.
