Description

The order of the term editor menu should be structured, maybe display only the most important items and move the others to "Others..."

Most important items are probably "Feature" and "Named Area"

Please use i18n (translations for term types themselves will also be offered soon, there is a ticket). Be aware that I changed from "other" to "others".

#12 - 01/18/2017 11:39 PM - Andreas Müller

Please also add a separator above "Others"

#13 - 01/19/2017 02:09 PM - Andreas Müller

- Private changed from Yes to No

#14 - 02/08/2017 05:25 PM - Patrick Plitzner

Separator works now.

i18n for "others" still does not work.

How should the i18n for the terms work? Are there any translation csv files? The code already calls the correct method I hope.

#18 - 03/13/2017 09:39 PM - Andreas Müller

"Others" is still not translated. Is this not possible without having the terms translated?

We may have a look together on the related tickets for translating terms as you have more experience with i18n in eclipse now.

@Andreas: Can you please check if this is still open? For example, "Others" is now translated when language is switched.

The translation of terms will be part of another ticket, "others" is well translated now.

Can we remove the separator before "Others" now. This is because we have more items in the sub-menu now and "others" belongs semantically to the terms which is not so clear anymore.

We can close this ticket afterwords.

#22 - 01/16/2019 02:21 PM - Patrick Plitzner

Removed separator

#23 - 11/03/2021 04:28 PM - Andreas Müller

- % Done changed from 80 to 100

The term menu is handled differently in the meanwhile anyway so I think we can close this ticket without having to check the final open issues.
