with the actual implementation, I could not reproduce this exception anymore. Editing the reference in name editor and bulk editor in parallel works fine.

mail from Norbert:

Hallo,

nur der Vollständigkeit halber:

der o.g. bug tritt übrigens regelmäßig auch dann auf, wenn ich im TaxEditor eine Suche gemacht habe und dann im gesuchten und geöffneten Taxon (auch nach Schließen der Suchergebnisanzeige) irgendetwas abspeichern möchte.

Schöne Grüße,  
Norbert

**#18 - 02/16/2018 02:05 PM - Katja Luther**

- Target version changed from Release 4.14 to Release 5.0

after playing around with a name opened in name editor and bulk editor I still could reproduce the exception

**#26 - 09/03/2022 11:10 AM - Andreas Müller**

- Status changed from In Progress to Feedback

- Target version changed from Reviewed Next Major Release to Release 5.33

This is a very old multiple-representations-problem ticket. Is there a reason why we think that it is still open or can we close the ticket? If keeping it open, do we have enough information to reproduce it?

**#27 - 09/12/2022 01:57 PM - Katja Luther**

- Status changed from Feedback to Worksforme

- Target version deleted (Release 5.33)

Tried to search with taxon search, open a taxon out of the search and editing different elements, everything works fine. Also editing the same taxon opened before in bulkeditor works. So I think we can close this ticket.
