Category:	taxeditor	Estimated time:	0:00 hour
Target version:	Release 5.46		
Severity:	normal		
Description			
<p>The Checklist Editor in the TaxEditor opens all taxa of a subtree and allows editing of distributions.</p> <p>This requires that the user has the required insert, update and delete permission on the given subtree and on the distribution feature. Otherwise the menu entry should be disabled.</p> <p>If it is possible to reduce rights for certain subsubtrees the according taxa need to be disabled in the Checklist Editor. E.g. someone has UPDATE rights on Family A but on a single Genus G in this family he has no rights the taxa in the genus should be disabled/locked.</p> <p>We want to give explicit rights only for editing distributions therefore we need the the possibility to add the feature as property string to the authority in the rights view of the editor.</p>

We should at least very soon know, how far rights&role work for distribution editor. And define what still needs to be done to make it fully work.

#3 - 04/10/2019 12:22 PM - Katja Luther

actually the distribution editor can be opened but the save throws a permission denied exception.

- We need a check whether the user has the rights on editing descriptions of the selected nodes.
- If the user does not have the rights at all, the menu item should not appear.
- If the user has the rights only on a subset only this subset should be opened in distribution editor.
