#### Description

This needs to be done for all repos in redmine:

[http://www.redmine.org/projects/redmine/wiki/HowTo\\_setup\\_automatic\\_refresh\\_of\\_repositories\\_in\\_Redmine\\_on\\_commit](http://www.redmine.org/projects/redmine/wiki/HowTo_setup_automatic_refresh_of_repositories_in_Redmine_on_commit)

done for all existing subprojects of EDIT:

- edit svn with /var/svn/edit/hooks/user-post-commit - no longer needed -
- cdm-dataportal.git
- cdmlib-apps
- cdmlib
- taxeditor

Seems like it didn't work. I had to update manually again

There was a permission problem with the post commit hook

the SVN is no longer synced with the git repositories. The svn repos which have been migrated to git are only archives and have readonly access. The refresh must therefore only be configured in git.

I created a generic post-receive hook which can be configured individually for the specific git repos:

```
/var/git/.hooks
```

I tested the hook, it works!

- *Keywords set to redmine, git*

No problems so far, the refresh works for all configured repos.
