

EDIT - bug #6007

Redmine: Wiki tables are not correctly mapped to new syntax

07/25/2016 01:21 PM - Andreas Müller

Status:	Worksforme	Start date:	
Priority:	New	Due date:

Target version:		Found in Version:	
Severity:	normal		
Description			
As an example see http://dev.e-taxonomy.eu/redmine/projects/edit/wiki/TCS			

History

#1 - 07/25/2016 01:33 PM - Andreas Kohlbecker

tables seem not (yet) to be supported <https://redmine.org/projects/redmine/wiki/RedmineTextFormattingMarkdown#Tables>

The original markdown syntax actually has no syntax for tables: <http://daringfireball.net/projects/markdown/syntax>

However, some flavours of markdown have support for tables: <https://github.com/adam-p/markdown-here/wiki/Markdown-Cheatsheet#tables>

Hey, there is support for tables in the redmine markdown <https://redmine.org/issues/23341>

e.g:

header	FAQ	List of Plugins
aaa	bbb	ccc

#3 - 09/23/2017 01:32 PM - Andreas Müller

- Category set to devOps

#4 - 06/10/2020 09:55 AM - Andreas Kohlbecker

- Status changed from New to Worksforme

many tables have been fixed manually, so there is no more need for general action on this topic.

The above linked table has been fixed manually by adding

```
|-----|-----|-----|
```

as separator between table header and body
