

Edit - task #6028

Post-migration (trac->redmine) fixes

08/02/2016 08:25 AM - Andreas Kohlbecker

Status:	Closed	Start date:	08/02/2016
Priority:	New	Due date:	
Assignee:	Andreas Kohlbecker	% Done:	100%
Category:	devOps	Estimated time:	0.00 hour
Target version:			
Severity:	normal		

Description

After the final migration from trac to redmine problems have been discovered which should have been solved during the migration. These problems now need to be fixed afterwards.

This can be done either by manipulating the database directly or by writing a rake script.

TODOS

Remove obsolete custom fields

Ich habe in der Track DB nachgesehen. Folgende Customfields sind dort definiert:

```
"dependencies"  
"due_assign"  
"due_close"  
"include_gantt"  
"parent"
```

Die können also alle weg.

Subtasks:

task # 6029: trac resolution to redmine status mapping invalid for `wontfix` and `inval...
