

EDIT - bug #6067

CdmEagerLoadingException after having multiple editors open for ~4 hours

09/12/2016 09:23 AM - Andreas Kohlbecker

Status:	New	Start date:	
Priority:	New	Due date:	
Assignee:	Katja Luther	% Done:	0%
Category:	taxeditor	Estimated time:	0:00 hour
Target version:	Unassigned CDM tickets	Found in Version:	
Severity:	normal		

Description

Hello,
nachdem ich über 40 Fenster über lange Zeit (mehrere Stunden) offen hatte, bekam ich die Fehlermeldungen
VG
Henning

History

#1 - 09/12/2016 09:50 AM - Andreas Müller

The relevant code is at CdmGenericDaoImpl.initializeCollection(UUID ownerUuid, ...) line 784

```
CdmBase cdmBase = load(ownerUuid, propertyPaths);
Field field = ReflectionUtils.findField(cdmBase.getClass(), fieldName);
```

So it looks like ownerUuid does not exist anymore. Maybe it was deleted before by one of the many sessions Henning had opened? From the stacktrace we can't say which uuid does not exist anymore.

So we could do the following:

Adjust the code in a way that the NPE is handled as a specific exception clearly explaining to the users that there is a required object that probably has been deleted in the meanwhile and therefore the required action can not be performed.

On cdmlib side this exception handling needs to be generic. More difficult is the editor side where this problem may occur at many different places and the question is if we want to catch and react on it always specifically.

Generally it is a concurrent transaction handling issue and which is a general issue that is not yet discussed and implemented properly.

#2 - 09/12/2016 09:50 AM - Andreas Müller

- Assignee changed from Andreas Müller to Katja Luther

#3 - 09/12/2016 10:04 AM - Andreas Kohlbecker

Henning was about to close some views/editors when this happened.

I think that this exception related to the fresh import that I applied to the running cdm instance while Henning had Editors with old data open. This is a very unusual situation and I don't think that we need to invest time for that, therefore I suggest to close this ticket as 'wontfix'.

#4 - 09/12/2016 10:18 AM - Andreas Müller

So it is you who deleted data in the meanwhile?

However, the general transaction problem exists. No matter if an object is deleted by a fresh import or by some other user or by the same user within another transaction and it may reappear.

So at least improving the error handling for uuids which do not have a persisted object anymore to me seems like a good idea (also at other places).

Same as creating a new ticket for general transaction handling.

#5 - 09/12/2016 10:29 AM - Andreas Kohlbecker

Andreas Müller wrote:

So it is you who deleted data in the meanwhile?

Exactly, the old data was deleted when applied the new import the db.
