

EDIT - bug #6087

Top level items not sorted in tree of advanced search areaFilter widget

Severity:	normal		
Description			
ich sehe gerade, dass zumindest bei Cuba http://portal.cybertaxonomy.org/flora-cuba/cdm_dataportal/search die Areale des Areas noch nicht sortiert sind. Die Sortierung sollte nach der des Vokabulars (OrderedTermVocabulary) erfolgen. ... ich habe mir das gerade bei den Cichorieen angeschaut, da scheint es auch nicht zu funktionieren: http://cichorieae.e-taxonomy.net/portal/cdm_dataportal/search

The ordering is now alphabetic but not according to the ordering in the vocabular as written in the description (especially for cuba this is important):

http://test.e-taxonomy.eu/dataportal/preview/flora-cuba/cdm_dataportal/search

http://test.e-taxonomy.eu/dataportal/preview/cichorieae/cdm_dataportal/search

Note: is it possible to increase the size of the area selection field? Especially for searching TDWG areas the current size is much too small as the vocabulary/number of used areas is large
