

Edit - task #6107

Establish performance monitoring

09/21/2016 03:19 PM - Andreas Kohlbecker

Status:	New	Start date:	09/21/2016
Priority:	New	Due date:	
Assignee:	Andreas Kohlbecker	% Done:	0%
Category:	devOps	Estimated time:	0.00 hour
Target version:	Unassigned CDM tickets		
Severity:	normal		

Description

The suggestions given in <https://www.infoq.com/articles/Diagnose-Microservice-Performance-Anti-Patterns> could help us improve the overall performance of the cdm services.

We should consider taking some/all of the following actions:

1. Use a performance monitoring tool, like
 - [stagemonitor](#) looks very complete and promising at first glance
 - [Dynatrace](#) commercial, very good?, promoted in the above names article
 - SpringInsight (from vmware?)
 - [XRebel](#)
2. Establish continuous performance monitoring in CI (Jenkins)
