

EDIT - bug #6122

bug # 6119 (Closed): Implement uuidAndTitleCache remote services

add titleCache service

10/06/2016 02:21 PM - Andreas Müller

| | | | |
|--|--------------------|--------------------------|-----------|
| Status: | Closed | Start date: | |
| Priority: | Highest | Due date: | |
| Assignee: | Andreas Kohlbecker | % Done: | 90% |
| Category: | cdmlib-remote | Estimated time: | 0:00 hour |
| Target version: | Release 4.4 | Found in Version: | |
| Severity: | normal | | |
| Description | | | |
| We need a service that returns only the titleCache for a given uuid. | | | |
| By default it returns the titleCache as stored in the database, with parameter refresh=true it may recompute the titleCache first. | | | |

There still seems to be an issue as the result for cuba classification on test is empty:

http://test.e-taxonomy.eu:80/cdmserver/flora_cuba/classification/5de394de-9c76-4b97-b04d-71be31c7f44b/titleCache?refresh=true

Seems to work now. I tested with

<http://api.cybertaxonomy.org/cichorieae/taxon/e64a9ec7-94c8-49ee-92ba-18f2065a960a/titleCache.json?refresh=false> and

<http://api.cybertaxonomy.org/cichorieae/taxon/e64a9ec7-94c8-49ee-92ba-18f2065a960a/titleCache.json?refresh=true> and got results, results where even slightly different (1 one space missing with refresh=true).

Also the above cuba example on test server works so I think we can close this ticket.
