I am not sure if these service methods are suitable for httpInvoker as they are asynchronously and return Futures. This needs to be checked.

This may be true. However, each CdmRemotingApplicationController requires this service. Alternatively we could implement in another way (e.g. by throwing an exception when being used).

... or we implement it similar to the ProgressMonitoring services which also handle asynchronous task but differently.

However, this is not my task. I only wanted to fix the compile error in TaxEditor code. If you think this needs to be done differently feel free to do so.
