

PhycoBank - task #6168

Full registration workflow model

10/27/2016 11:02 AM - Andreas Kohlbecker

Status:	Closed	Start date:	
Priority:	New	Due date:	
Assignee:	Wolf-Henning Kusber	% Done:	100%
Category:	Workflow	Estimated time:	0:00 hour
Target version:	Technical planning completed		
Description			
Model the full registration workflow.			
<ul style="list-style-type: none">An excellent BPMN Documentation is found at: https://camunda.org/bpmn/reference/Camunda also offers a excellent free BPMN editor: https://camunda.org/download/modeler/			
While being processed in the workflow a registration record can have one of multiple states:			
<ul style="list-style-type: none">preparation: A new record which is being edited by the Authorcuration: A record ready for the curator to be validated.ready: The record has passed the validation by the curator and is ready for publication.published: The name or typification has finally been published. This state will either be set manually or automatically by the system once the state is <i>ready</i> and when the <i>datePublished</i> and pages of the related Reference is set. For new publications (<i>datePublished</i> >= 2000-01-01) the doi should also be mandatory.rejected: The registration has been rejected, the process is aborted and the record is preserved.			
The BPMN file of the workflow is located in the PhycoBank github repository: AlgenRegistrierungsWorkflow.bpmn
