Is this still an open issue? We already seem to have a UI for selfregistration which seems to cover this. If there are open issues or if we want to improve the UI we should handle this in a new ticket, I guess.

- Assignee changed from Wolf-Henning Kusber to Andreas Müller

For registration some data is required:

Username: done

Password: done

Email: done

Organisation: not done because of user feedbacks, for people that are unemployed scientists (e.g. after finishing the dissertation of fee lancers, this might be a blocker if mandatory), currently there is no field to insert the Organisation, this will be a feature request with low priority)

Optional Data:

Family Name: done

Given name: done

The widget should be protected with a CAPTCHA or any other means.

Data seems to be protected, A.K. reworked the self registration because of issues. Could you check this? If you see no problems, this ticket can be set to 100% resolved and can be closed.
