#3 - 11/24/2016 10:58 AM - Andreas Müller

- Status changed from Resolved to Feedback

- Assignee changed from Andreas Müller to Patrick Plitzner

Works well and ticket can be closed. Only issues might be layout issues:

1. Personally I find it better to have a color field that shows the current color and a button that allows editing, instead of clicking on the color field itself (might not be intuitively understood by users)
2. Maybe we can have a bit more between "Symbol" and "Color". Now both field touch each other what does not look so nice.
3. What about a frame around the field? Is more in line with the text fields and for color white it gives you an idea that there is a field.
