

## Edit - bug #6217

### Adapt colour mapping in dataportals

11/24/2016 11:06 AM - Andreas Müller

<b>Status:</b>	New	<b>Start date:</b>	11/24/2016
<b>Priority:</b>	New	<b>Due date:</b>	
<b>Assignee:</b>	Andreas Kohlbecker	<b>% Done:</b>	0%
<b>Category:</b>	cdm-dataportal	<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>	Unassigned CDM tickets	<b>Found in Version:</b>	Release 4.4
<b>Severity:</b>	normal		
<b>Description</b>			
<p>Currently there is the possibility to adapt the color of a PresenceAbsenceTerm in a distribution map by using the according experimental feature.</p> <p>There are 2 issues about it:</p> <ul style="list-style-type: none"><li>• Currently it uses idInVocabulary, which is not necessarily a unique attribute. We should switch to uuid. Even if this is not easy to read for humans, it is exact. As this feature should be used only for exceptional cases (e.g. multiple data portals on one database) this is acceptable.</li><li>• The documentation needs to be updated. It should be clearly stated that this feature should be used ONLY if the defaultColor attribute of PresenceAbsenceTerm can not be used. Also the given abbreviations for the terms should be removed as they are partly wrong now (since last model update) and should not be used anymore (see above)</li></ul>

- Related to feature request #6216: Allow changing of defaultColor for PresenceAbsenceTerm added

#### #2 - 11/24/2016 11:07 AM - Andreas Müller

- Found in Version set to Release 4.4

#### #3 - 11/24/2016 11:08 AM - Andreas Müller

Projects that might want to use the feature are Caucasus and Asteracea which do have or plan to have multiple data portals on the same data.
